Projects

Transcendence
Web-based pong game in JavaScript, with a fastify/node.js backend and SQLite database.

Internet Relay Chat Server
A chat server written in C++, handling client communication through socket programming.

Minishell
A custom shell written in C, replicating the behaviour of the bash command line shell.

Libft
Library with 34 custom functions, mainly orienting to C standard library functions.

Above only constitutes a selection, please refer to my GitHub page for additional projects.

Experience

2022 - 2023
Cariad SE | Wolfsburg (Germany)
Senior Requirements Management Specialist

Feature planning, user story creation and refinement for Volkswagen's new vehicle connectivity smartphone application, supporting the electric ID. vehicle family.
Contributing to strategic product steering in the scope of the Scaled Agile Framework for Enterprises (SAFe) in close collaboration with app's front- and backend development team and adjacent departments (among others: API team, QA, legal, marketing, customer care). Accompanying feature implementation with hands-on testing and logfile analysis.

2018 - 2022
Volkswagen AG | Wolfsburg (Germany)
Product Manager

Identical set and scope of duties as with Cariad (s. above).

2017 - 2018
Volkswagen AG | Wolfsburg (Germany)
Rollout Manager

International rollout planning and execution for the retrofit vehicle connectivity solution "We Connect Go" in the department of Digital Sales. Close alignment with Volkswagen's international sales companies and importers for ensuring a successful market launch. Mediating between market demands and capacity of internal development team.

2015- 2017
Volkswagen AG | Wolfsburg (Germany)
Customer Care Agent

Handling of escalated customer enquiries and complaints worldwide in close coordination with Volkswagen's importers and sales organisations.
Member of communications task force for mitigating the brand's reputational loss in course of the Diesel emissions crisis.
